

## PRESS RELEASE

### European Ventilation Industry Association (EVIA) and Eurovent jointly provide new guidance to market on Ecodesign and Energy labelling rules for ventilation units

**Brussels, 8 March 2017** – The European Ventilation Industry Association (EVIA) and the Eurovent Association have come together to release the third edition of a joint comprehensive FAQ on Ecodesign and Energy labelling requirements for ventilation units. It aims to provide answers to the many questions the market still has concerning EU Regulations 1253/2014 and 1254/2014 to ensure their proper implementation.

Building on the two first versions of the FAQ, this document is the result of an intensive work carried out by EVIA and Eurovent members based on their experience with other market participants, such as their customers (designers, installers, architects). It therefore constitutes EVIA's and Eurovent's contribution to a better understanding of the Regulations and to their more uniform and coherent application across different sectors and product groups across the market. It reflects the views of a vast majority of manufacturers of ventilation units as well as other market participants in Europe and the Middle East and Europe's leading national sector associations.

This document is addressed to the industry, but also the European Commission, EU Member States, enforcement bodies and others stakeholders who need to be informed of the provisions of these Regulations (e.g. trade and consumer associations standardisation bodies, manufacturers, importers, distributors, conformity assessment bodies and trade unions).

The publication is intended solely as a Guidance Document – only the text of the Union harmonisation act itself has legal force. It is not a static document and aims to incorporate additional questions and answers over time.

### About EVIA

*The European Ventilation Industry Association (EVIA) was established in July 2010 in order to represent the ventilation and fan industry both in Brussels with the EU institutions and relevant stakeholders and in the national capitals with our partners. Our membership is composed of 39 member companies and 5 national associations across Europe realising an annual turnover of over 7 Billion Euros and employing more than 45,000 people in Europe. ## **About Eurovent**

*Europe's Industry Association for Indoor Climate, Process Cooling, and Food Cold Chain Technologies – thinking beyond 'HVAC&R'*

*Eurovent is Europe's Industry Association for Indoor Climate, Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe, the Middle East and Africa represent more than 1.000 companies, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn Euros, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level-playing field for the entire industry independent from organisation sizes or membership fees.
